Castilla y León: a success story

Resin yield in Castilla y León (Tn)

Let's see... from 2008 to 2018:

- less than 2,000 to almost 12,000 Tn yield
- less than 100 to more than 1,000 workers
- 300,000 to 3,200,000 tapped pines
- 3 to 7 industrial plants
- <20,000 to >120.000 hectares of managed pine forests for resin

So, quite a lot of stakeholders... how to interact with them?

And the “Mesa de la Resina”...

Previous compromises:

1.-Municipality of Coca (province of Segovia) political commitment:

1998 Agreement on local resin production

- With resin workers (**Rincón de la Vega**)
- With industry (**LURESA**)

http://www.premioconama.org/premios11/premios/proyectos_popup.php?id=46

2.-Junta de Castilla y León technical commitment, specially from **Segovia Forest Service**

that maintained the activity, with a minimum production,
the know-how

3.-JCyL &CESEFOR 2005 project to recover resin production

4.-Renewed regional political commitment:

Regional Parliament Motion on Resin of 17/06/2010 (PNL-1247)

[http://www.ccyL.es/Publicaciones/TextoEntradaDiario?Legislatura=7&SeriePublicacion=DS\(P\)&NumeroPublicacion=102](http://www.ccyL.es/Publicaciones/TextoEntradaDiario?Legislatura=7&SeriePublicacion=DS(P)&NumeroPublicacion=102)

- Comandment for the Government: actions to boost resin sector

5.- 04/03/2011: Stablishing the “CyL Resin Roundtable”

What it is (– and is not)?

- An unofficial frame
 - A non-legal entity
 - An advisory body
 - An opportunity for the meeting of the agents of the sector
 - A place to freely deliberate and contrasting opinions
 - A platform to launch projects and innovations
 - A way to promote improvement
 - A portal to present problems and to ask for solutions (to the public body and between members themselves)
-
- Not an official nor a compulsory forum; not written rules

Who are the members?

- Forest owners: private and public (federations)
 - Resin tappers: National Association of Resin Tappers and tapper enterprises
 - Industries: (first and second transformation: rosin and turpentine)
 - Scientists: University
 - Other Associations (National Association on Defence and Vertebration of Resin Sector)
 - Public Body
 - Secretary: Cesefor
-
- Guests according to matter

- 2012: Participation in Forest Resources Mobilisation Programme
- II Symposium of Natural Resin (Coca, 2013)
- 2013: Reception on National Parliament (Madrid) and European Commission (Brussels)
- Orden HAP/2222/2014: a new index of net yield is established for taxpayers dedicated to the forestry activity of extraction of resin (modification of special regime of VAT to apply the objective estimation method)
- 7/2017 Law, modifying Forests Regional Law: priority to local resin tappers in the awarding of resin exploitation in public forests

Thanks a lot for your attention !
